

Get your Town Committee online!

If your town committee still does not have a website, you are losing access to valuable volunteers from all generations. The CT Democrats offer free & affordable website services that will help get your DTC online *instantly!*

What are the benefits of the CT Democrats web services?

FREE and FREEDOM. We offer free hosting and domain URLs. For example, the Stamford Democratic Town Committee can be found at <http://stamford.dems.info>. We will show you how to update your website so that you have the freedom to add, remove, and update information.

We currently have a domain name but want to move to the CT Dems servers.

You can have your current domain name, for example, www.hebrondems.com, point to our web servers and still use our free hosting.

I have no experience with websites but I want to get my town committee online.

The CT Democrats will help you design a site for your town committee for free. If you know how to use a computer and are willing to learn an easy-to-use software application, we'll even show you how to update your website for free. The only cost to your town committee is to purchase the software, which currently is \$150.

What if we have someone on our town committee that can create our website?

We will give that person the necessary access information to our server so that they can install the website.

Do we get e-mail?

Yes, we will set-up each town committee with one e-mail account: town@dems.info

Why a website is vital to any town committee:

- Reach young Internet users
- Communicate with the press
- Promote your candidates and issues
- Advertise your events and fundraisers
- Be better than the Republicans online
